

PIONEER MINE HAS RESUMED OPERATIONS

FAMOUS PRODUCER, LONG IN
LITIGATION, HAS BIG
FORCE AT WORK.

W. J. Tobin and R. J. Tobin, two well-known mining operators of Colorado and Nevada, with headquarters in Denver, came to Tonopah in an auto last evening from the south and left again this morning for San Francisco.

The Tobin brothers are large stockholders in the Pioneer Consolidated Mines company, whose estate is located at Pioneer. It was upon this company's property that lessees made the sensational strike that placed the camp of Pioneer on the map a little less than two years ago. The lessees took in the neighborhood of half a million dollars out of the Bimetallite claim.

Owing to litigation, the property has been closed down for several months. The trouble, however, has been practically settled, and the Pioneer company will push development work in a vigorous manner from now on.

The Messrs. Tobin have just come up from Pioneer, where orders were given H. A. Canning, manager, to start work. This has been done, and drifting has been taken up where the lessees left off at the 170 and 260-foot levels.

From the former level ore is being blocked out. This contains much free gold and is of commercial value. It is the intention of the Pioneer company, just as soon as developments will justify it, to build a mill on the ground.

David R. C. Brown, the big Colorado mining man, is president of the Pioneer company; George Wingfield, of this state, is first vice president; Judge J. C. Helm, of Denver, second vice president; Charles J. Clayton, secretary. The directorate will be changed within the next few weeks, in all probability.

MANHATTAN BIG FOUR IS ATTRACTING ALL EYES

Bullion Shipments Daily Occurances and
Property Promises to Surpass the
Goldfield Combination Mine

Another bar of the yellow metal arrived this morning from Manhattan and is resting in the vaults of the Tonopah Banking Corporation. The bar is the regular daily shipment from the ore being run at the War Eagle mill for the Big Four lease, and is one of the smallest that has been shipped in the past ten days—being valued at a trifle over \$3000.

This wonderful property is producing more than the great Combination did at Goldfield when it was of the same age as the Big Four. The Combination at that time attracted the eyes of the mining world and caused the big Goldfield boom.

It is predicted by many, and with good foundation, that the Big Four will do for Manhattan what the Combination did for the southern camp, and a big boom is looked for before the summer is over.

A mining man from that camp the other day, in talking with a representative of the Bonanza, said: "You cannot keep Manhattan down. It has had a hard struggle since the earthquake in San Francisco, but the camp is now paying its own way. You can stand on the high hills above the town and as far as you can see are dumps of the various properties, and all have ore. This camp is destined to be a great gold producer."

BUSINESS PART OF HAWTHORNE VISITED BY FIRE

HAWTHORNE, Nev., June 29.—At 2 o'clock yesterday morning a fire started in the saloon building of Walter Cole, adjoining the Summerfield store, which caused the burning down of eight business houses. The loss is estimated at about \$25,000.

When the flames were first discovered practically the whole interior of the Cole saloon was ablaze. The volunteer fire department responded and battled heroically with the flames, but the roof of the building fell almost immediately, and a shower of sparks fell on the adjoining buildings. Within a few moments four other structures were in flames, and after a half hour's work it was found that, in order to save the town, the buildings must be allowed to burn and attention paid solely to adjoining structures.

Under the direction of Fire Chief Kelly and Lieutenant Ollie Becker,

rolls of blankets were secured from the Adams & Miller store. These were saturated with water and placed on the roofs of threatened buildings. A continual stream of water was kept playing on them, with the result that the fire was confined to the single Main street block.

The following are the total losses as estimated yesterday:

Summerfield Mercantile Co.	\$10,000
Howard shoe store	500
George Paslow's barbershop	1,000
Boelling Drug Co.	2,000
Clem Ogg's building	1,000
Fred Wallace's saloon	1,000
Other personal losses	5

Of the above, Summerfield, Ogg and Esber carried partial insurance. The others sustained total losses.

Other locations were secured at once by the merchants, and all announced their intention of continuing business. All will rebuild on the old sites in the near future.

ILLINOIS CITY IS MECCA FOR THE WINE DRINKERS

GRANITE CITY, Ill., June 29.—This city seems to be destined to become the Mecca of all those who love to gaze fixedly upon the wife when it is red.

The social mayor of Granite City, Marshall E. Kirkpatrick, has decided that being drunk is not a crime. A drunk is not a criminal, and the victim of circumstances. And no victim of circumstances ought to be locked up for indulging in a little merriment. He has issued an order to Adolphus White, chief of police, instructing the force what course to pursue the next time a citizen with uncertain steps is encountered.

If the citizen does not destroy property, does not attempt to commit a crime, he is not to be arrested. But if the officer thinks the citizen may disturb the peace in some manner, he is to take the bibulous one home.

AGRICULTURE AS A SCIENCE

Hail to the tiller of the soil. He has won the respect of the world. Perhaps you have noticed that it isn't so common to deride his occupation as it used to be before Uncle Sam discovered it to be a science. Now young men are flocking to the agricultural schools and colleges and many of them are graduating into professorships, or into positions as experts with the government.

One of the latter has just returned to Washington after spending two months in Spain and Sicily, investigating lemon growing. He is G. Harold Powell, whose work for the department of agriculture in the investigation of causes of fruit decay, in cold storage and in transit, attracted such wide attention. The citrus fruit growers of California held his talents in such esteem that they tried to get him to go out there. When they got up to an offer of \$10,000 a year salary he succumbed, and he is now secretary and manager of the Citrus Protective League of California.

CHAMP CLARK HAS GOOD CHANCE

Edwin M. Clendenen, general secretary of the Commercial Club of Kansas City, while in Washington last week, declared that from his observation of the sentiment among the democrats of Missouri, "no matter what supporters of former Gov. Folk may think or do, the delegation from the state, I believe, will be for Speaker Champ Clark for president in the democratic national convention."

Clark's friends are rallying to his support because of the mixup in his home state.

Clendenen said: "Regardless of politics, the people of Missouri have a just pride in Speaker Clark, and though I am not a democrat, I am confident that the big majority of the voters of that party favor Clark for president rather than Folk."
